

# AmazingMart Business Analysis

Profit by country

Profit by sub category

Profit vs sales for by customer

Among the 13 countries Amazing Mart do business in EU, it performs well in UK and Germany. They need to review their loss making businesses in Sweden.

Considering sub categories they should review tables under furniture. When it comes to customers they better reward Angie while negotiate with Melody.

Sales vs target by category

It seems furniture department sets linear constant growing target each month. Office supplies sets fluctuating targets monthly basis. Technology department follows annual targets.
